Remote Desktop via Mail

- Instruction -

Hello there,

This is a brief guide to the <u>Remote-Desktop-via-Mail</u> program. This instruction will show you how to send a syntactically correct request to control the remote computer in your own way!

This instruction will go through 21 commands, each with an example (if it requires a content that cannot be left blank). If the command does not request the content, the content will not be mentioned in this instruction.

The group of commands will be divided into two groups: commands about the **control** feature and commands that are **systematic**.

1. Instruction:

Subject: RDM-HELP

- 2. Control commands:
 - a. PROCESS:
 - View a list of running processes:

Subject: RDM-LIST PROCESS

• Kill a particular process by specifying the ID:

Subject: RDM-KILL PROCESS

Content: <ID of process that you want to kill>

Eg: Content: 13579

- b. APP:
 - View a list of running applications:

Subject: RDM-LIST APP

• Kill a particular application by specifying the ID:

Subject: RDM-KILL APP

Content: <ID of application that you want to kill>

Eg: Content: 24680

- c. SCREEN:
 - Shot screen:

Subject: RDM-CAPTURE SCREEN

• Record screen:

Subject: RDM-RECORD SCREEN

Content: <input recording time, unit: seconds>

Eg: Content: 10

d. WEBCAM:

• Shot webcam:

Subject: RDM-SHOT WEBCAM

• Record webcam:

Subject: RDM-RECORD WEBCAM

Content: <input recording time, unit: seconds>

Eg: Content: 10

3. Systematic commands:

a. FILE SYSTEM:

• View a tree of a particular system file:

Subject: RDM-VIEW FILE SYSTEM

Content: <path of the folder that you want to view>

Note: The content can be blank, that means "I want to view the root"

Eg: Content: C:\Users\Admin

• Copy a file:

Subject: RDM-COPY FILE SYSTEM

Content: "<path of the file you want to copy>" "<path of the folder you want to copy to>"

Eg: Content: "C:\Users\Admin\Documents\GitHub\report.pdf"

"C:\Users\Admin\Documents"

Download a file:

Subject: RDM-DOWNLOAD FILE SYSTEM

Content: <path of the file that you want to download>

Eg: Content: C:\Users\Admin\Documents\instruction.pdf

b. KEYLOGGER:

Subject: RDM-KEYLOGGER

Content: <input tracking time, unit: seconds>

Eg: Content: 10

c. SHUTDOWN:

Subject: RDM-SHUTDOWN

d. **RESTART**:

Subject: RDM-RESTART

e. REGISTRY:

Create a registry key:

Subject: RDM-CREATE REGISTRY

Content: <Hotkey>,<path of the key (folder) you want to create key in>,<name of the new key>

Eg: Content: HKEY_CURRENT_CONFIG,Software\Fonts,NewFont

• Set value for a key:

Subject: RDM-SET REGISTRY

Content: <Hotkey>,<path of the key you want to set value>,<name of the value you want to set>,<datatype of the value>,<value>

Eg: Content:

HKEY_CURRENT_USER,Microsoft\Windows\CurrentVersion\Explorer\StartupApprov 00 00 00 00 00 00 00 00 00 00 00

• Get the value of a key:

Subject: RDM-GET REGISTRY

Content: <Hotkey>,<path of the key you want to set value>,<name of the value you want to get>

Eg: Content:

HKEY_CURRENT_USER,Microsoft\Windows\CurrentVersion\Explorer\StartupApprov

• Write a new key, value in the system:

Subject: RDM-WRITE REGISTRY

Content: <Blocks of code according structure of REG file>

Note: The content can be blank, but email must attach a REG file.

Eg: Content:

```
Windows Registry Editor Version 5.00

[HKEY_CURRENT_USER\SOFTWARE\Classes\.bmp]
@="PhotoViewer.FileAssoc.Tiff"

[HKEY_CURRENT_USER\SOFTWARE\Classes\.gif]
@="PhotoViewer.FileAssoc.Tiff"

[HKEY_CURRENT_USER\SOFTWARE\Classes\.ico]
@="PhotoViewer.FileAssoc.Tiff"

[HKEY_CURRENT_USER\SOFTWARE\Classes\.jpeg]
@="PhotoViewer.FileAssoc.Tiff"

[HKEY_CURRENT_USER\SOFTWARE\Classes\.jpeg]
@="PhotoViewer.FileAssoc.Tiff"
```

```
[HKEY_CURRENT_USER\SOFTWARE\Classes\.png]
@="PhotoViewer.FileAssoc.Tiff"
[\texttt{HKEY\_CURRENT\_USER} \setminus \texttt{SOFTWARE} \setminus \texttt{Microsoft} \setminus \texttt{Windows} \setminus \texttt{CurrentVersion} \setminus \texttt{Explorer} \setminus \texttt{FileExts} \setminus \texttt{gif} \setminus \texttt{Operbound} \setminus \texttt{CurrentVersion} \setminus \texttt{Explorer} \setminus \texttt{FileExts} \setminus \texttt{gif} \setminus \texttt{Operbound} \setminus \texttt{CurrentVersion} \setminus \texttt{Explorer} \setminus \texttt{FileExts} \setminus \texttt{gif} \setminus \texttt{Operbound} \setminus \texttt{Giff} \setminus 
nWithProgids]
"PhotoViewer.FileAssoc.Tiff"=hex(0):
[HKEY_CURRENT_USER\SOFTWARE\Microsoft\Windows\CurrentVersion\Explorer\FileExts\.ico\Ope
nWithProgids]
"PhotoViewer.FileAssoc.Tiff"=hex(0):
[\texttt{HKEY\_CURRENT\_USER} \setminus \texttt{SOFTWARE} \setminus \texttt{Microsoft} \setminus \texttt{Windows} \setminus \texttt{CurrentVersion} \setminus \texttt{Explorer} \setminus \texttt{FileExts} \setminus \texttt{Jpeg} \setminus \texttt{Option}
enWithProgids]
"PhotoViewer.FileAssoc.Tiff"=hex(0):
[HKEY_CURRENT_USER\SOFTWARE\Microsoft\Windows\CurrentVersion\Explorer\FileExts\.bmp\Ope
nWithProgids]
"PhotoViewer.FileAssoc.Tiff"=hex(0):\\
[\texttt{HKEY\_CURRENT\_USER} \texttt{SOFTWARE} \texttt{Microsoft} \texttt{Windows} \texttt{CurrentVersion} \texttt{Explorer} \texttt{FileExts}.] pg \texttt{Opertime} \texttt{Opertime} \texttt{Microsoft} \texttt{Mi
nWithProgids]
"PhotoViewer.FileAssoc.Tiff"=hex(0):
[HKEY_CURRENT_USER\SOFTWARE\Microsoft\Windows\CurrentVersion\Explorer\FileExts\.png\Ope
nWithProaids1
"PhotoViewer.FileAssoc.Tiff"=hex(0):
```

• Delete a key:

Subject: RDM-DELETE KEY REGISTRY

Content: <Hotkey>,<path to the key you want to delete>

Note: If you delete a key having some subkeys, they will be deleted too.

Eg: Content: HKEY_CURRENT_CONFIG,Software\Fonts\NewFont

• Delete value of a key:

Subject: RDM-DELETE VALUE REGISTRY

Content: <Hotkey>,<path to the key you want to delete its value>,<name of the value you want to delete>

Eg: Content:

HKEY_CURRENT_USER,Microsoft\Windows\CurrentVersion\Explorer\StartupApprov

Hope this instruction is useful to you.

Best regard,

Team 6.
